Rahul Chourasia

var vs let vs const

Let's Swipe Right

var

var apple = 🍎

a thing in a box named "apple"

apple = 🍏

you can swap item later

let

let apple = 🍎

a thing in a box named "apple" w/ protection shield

apple = ~~🍏~~ NG

apple = 🍏 ok!

you can swap item only if you ask inside of the shield

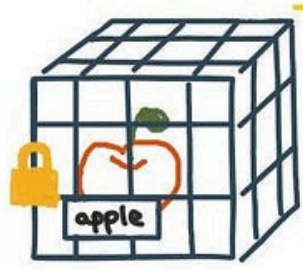

const

const apple = 🍎

a thing in LOCKED cage named "apple"

apple = ~~🍏~~ NG

you can't swap item later.

apple.multiply(3) ok!

... but you can ask the item to change itself (if the item has method to do that)

Let's Swipe Right

Declaration

Initialisation/
Assignment

Usage

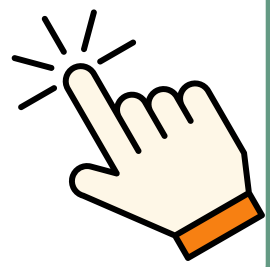

var a;

a=100;

var a = 100;

a + 30;

Let's Swipe Right

Keywords	var	let	const
Eample	var a = 10	let b = 10	const c = 10
Initialization	Can be declared without an initial value	Can be declared without an initial value	Must be assigned an initial value when declared
Re-declaration	Can be redeclared within the same scope	Cannot be redeclared within the same block scope	Cannot be redeclared within the same block scope
Re-initialization	Can be reassigned	Can be reassigned	Cannot be reassigned
Scope	Function-scoped	Block-scoped	Block-scoped
Hoisted	Hoisted to the function/global scope, initialized with undefined	Hoisted to the block scope, not initialized	Hoisted to the block scope, not initialized
Introduced	Available in JavaScript since the beginning-1995	Introduced in ECMAScript 6 (ES6), also known as ECMAScript 2015	Introduced in ECMAScript 6 (ES6), also known as ECMAScript 2015
